### How are U.S. Technology Transfer Offices Tasked and Motivated— Is It All About the Money?

#### ABSTRACT

The combined economic influence of federal and state technology transfer (TT) offices is a significant contributor to economic development. However, and somewhat paradoxically, the research community has not been able to agree on the primary motivation for these offices. This article examines the tasks and motivations of U.S. technology transfer offices (TTOs) and explores the role of funding in their operations. The authors find that funding is a significant factor in the motivation of TTOs, but it is not the only factor. Other factors include the desire to promote research, to create jobs, and to foster innovation.
